

# NLB unveils upgraded Mobile App to provide a more personalised and enriching experience

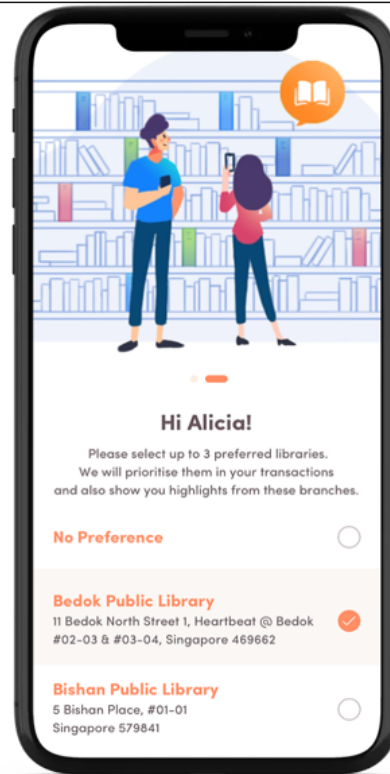

Singapore, 23 February 2021

## ANNEX

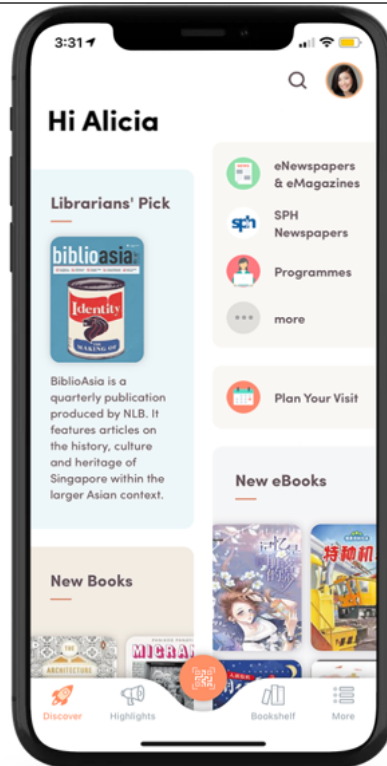

### Key new features of the revamped NLB mobile app

Patrons will be required to provide a preferred name upon their first login. This will be used to address them throughout the app.

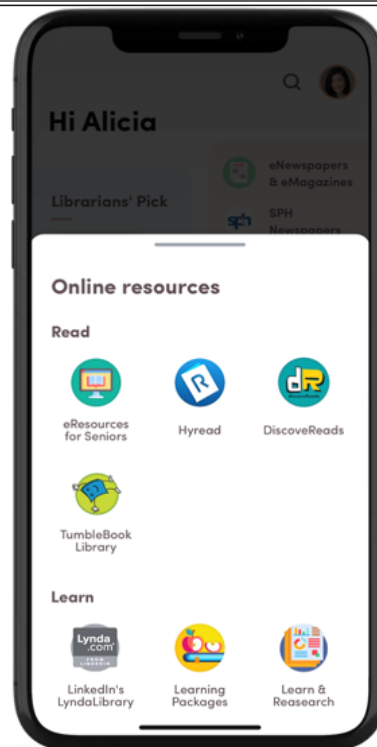

Patrons may select up to three of their favourite libraries. This makes it convenient to check the availability of certain items or make a reservation at these specific libraries.

The Discover tab allows users to check out new arrivals, book titles curated by librarians, and personalised reading recommendations. There are also shortcuts to digital resources such as eMagazines and eNewspapers.

There will be shortcuts to explore more digital resources.

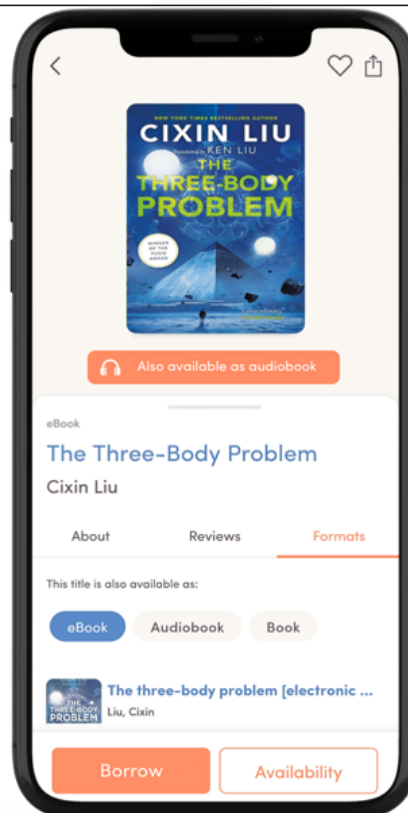

The Highlights section showcases programmes, content and events highlights recommended by our librarians.

These highlights are filtered by the patrons' preferred libraries, and posts with a 'Global' tag, which encompass activities found at all our libraries.

Patrons can immediately see if a title is available in book, eBook and/or audiobook format.

### Enhanced Scan feature

Patrons can quickly scan a title to borrow it, and switch to different accounts easily while browsing.

Patrons can also scan to check if they have borrowed the item before as the loan history is easily accessible. This feature makes it easy to keep track of one's reading journey and borrow new items. This is especially useful for those patrons who regularly borrow items on behalf of others such as their family members.
