Title: Basement

**Composer: Sonya Tracy** 

**Lyricist: Sonya Tracy** 

Walking down the street one day See what's going on There's trouble in the area There's something really wrong Hey mother can you hear me? Thru the concrete and the steel Poison filled my body And it took away my youth Wooh.... A revolution burning thru A new religion A whole new you A meaning in life You decide Wooh.... Walking down the street one day See what's going on There's trouble in the area There's something really wrong Hey mother can you hear me?

Something's going on....
