

Holiday Specials: Make Your Own Vegetable Garden!

Materials needed:

- Big paper plate
- Watercolour paint
- Paintbrush
- Scissors
- Foam papers (white, green, orange and brown)
- Transparent tape
- Hole punch
- Brown yarn

Instructions:

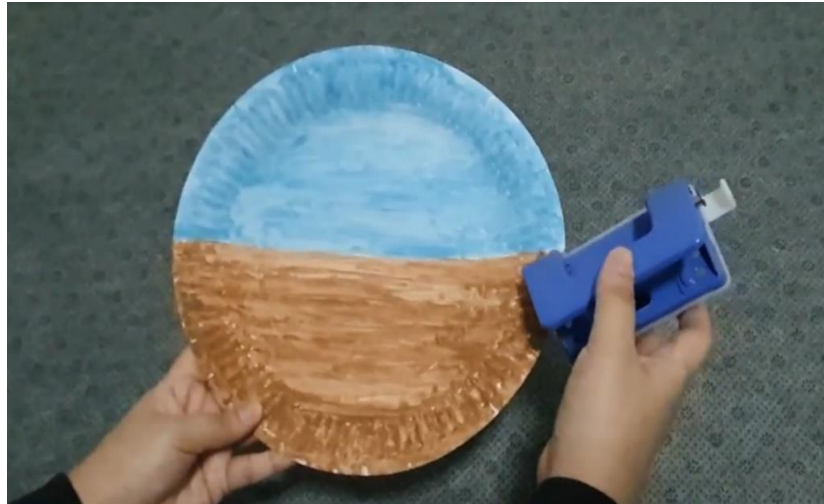

1. Start by painting the top half of the paper plate blue and then paint the bottom half, brown.

2. Next, cut out any vegetable pattern using the foam papers. Tape the vegetables to the leaves. You can try to make a carrot, a potato and a turnip. They are examples of root vegetables.

3. Use a hole punch to make holes along the bottom half of the paper plate.

4. Use a strand of brown yarn of about 2 meters or longer. Thread the yarn through the holes. This will become the soil at the brown area.

5. Continue to thread the yarn repeatedly until it looks like this.

6. Tape the ends of the yarn to the back of the paper plate.

7. Finally, slot in the vegetables.

8. There you have it, your very own vegetable garden!
